DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed 30 January 2004 has been entered.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
3. The application has been amended as follows: **In the claims**: Please cancel claims 23-27.

Election/Restrictions

4. This application is in condition for allowance except for the presence of claims 23-27 to an invention non-elected without traverse. Accordingly, claims 23-27 have been cancelled.

Allowable Subject Matter

5. Claims 58-84 are allowed.
6. The following is an examiner's statement of reasons for allowance: Applicant's amendment and arguments, submitted 30 January 2004, are persuasive. Regarding independent claim 58, the prior art of record neither shows or suggests a gas discharge display device comprising, in addition to other limitations of the claim, a filter comprising a single composition disposed on a front substrate, wherein a light-emission intensity of

Art Unit: 2879

at least one of the fluorescent substances of red, green, and blue is set to be larger than would be necessary to display an intended white color. Due to their dependency upon independent claim 58, claims 59-77 and 83-84 are also allowable.

7. Regarding independent claim 78, the prior art of record neither shows or suggests a gas discharge display device comprising, in addition to other limitations of the claim, a filter comprising a single composition disposed on a front substrate, wherein a light-emission intensity of at least one of the fluorescent substances of red, green, and blue is set to be larger than would be necessary to display an intended white color, and wherein the filter has a wavelength of lowest transmissivity of within a range of 560 to 610 nanometers. Due to their dependency upon independent claim 78, claims 59-82 are also allowable.

8. The subject filter, as described earlier, is provided for reducing the influence of light-emission of the discharge gas and increasing the color reproducibility of the display device. The design is new and unique to the art.

9. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
